

Attorney Docket No. QSTH-01400

**Amendments to the specification:**

On page 3, please amend paragraph 10 as follows:

[0010] In a preferred embodiment, the aspects of the present invention are provided in the context of an adaptable computing engine in accordance with the description in co-pending U.S. Patent application, Ser. No. 09/815,122, entitled "Adaptive Integrated Circuitry with Heterogeneous and Reconfigurable Matrices of Diverse and Adaptive Computational Units Having Fixed, Application Specific Computational Elements," assigned to the assignee of the present invention and incorporated by reference in its entirety herein. Portions of that description are reproduced hereinbelow for clarity of presentation of the aspects of the present invention.
